100 metres.

That is roughly the distance that the #Seat #Tarraco has to cover. It does not seem like much, but the challenge becomes more complicated when you throw in a 60 degree slope and tonnes of soft sand beneath the wheels. How do you get to the top of a mountain of sand without failing in the attempt? Stefan Ilijevic, who is responsible for Pre-development, Patents and Innovation at #Seat, gives us the keys to success.
